

Iran indie music Hub

Description

- We plan to create a digital platform—**Iran Indie Music Hub**—that caters exclusively to **independent musicians** in Iran. It will be a **multi-functional e-commerce website** with these core features:
- **Music Upload & Distribution:** Artists can upload their songs and build a digital music library
- **Collaboration Tools:** Musicians can find and connect with other artists to co-create projects
- **Monetization Options:** Services like selling tracks, teaching lessons, offering beatmaking/mixing/mastering
- **Localized Support:** Persian language interface, legal compliance, and Rial-based transactions
- **Digital Wallet Integration:** Artists can earn directly in Iranian Rials

Needs

- 1.No current platform** exists in Iran to fully support the creative and financial needs of independent musicians.
- 2.Access to foreign platforms** is limited (e.g., PayPal banned, VPN required).
- 3.Lack of collaboration spaces** where artists can meet and create together.
- 4.No monetization support** for music-related services or education.

Compared to Iranian similar Platforms

Feature	Iran Indie Music Hub	Existing Local Platforms(like Radio javan)
Focus on Independent Artists	Yes	Mostly mainstream
Self-Publishing Tools	Anyone can upload	Curation-only
Monetization Beyond Streaming	Services, Lessons, etc.	Streaming only
Artist Collaboration	Community-based	Not available

Estimated Initial Investment

Item	Cost (IRR)	Provider / Source
UI/UX Design	5,000,000	Freelancers (Ponisha / KarajKala)
Web Development (MVP)	30,000,000	Ponisha / Taskulu
Hosting & Server (1 yr)	2,000,000	Pars Pack / Mihan Web Host
Domain (.ir)	100,000	IRNIC.ir
Logo & Branding	1,000,000	Freelancers (Instagram / Ponisha)
Payment Gateway	0	ZarinPal / IDPay (Shaparak-certified)
SSL & Misc. Tools	1,500,000	Cloudflare, Telegram bots, testing tools

Timeline Plan

Phase	Timeline	Activities
Phase 1 – Research & Design	Month 1	Market research, UI wireframing, and planning
Phase 2 – Development	Month 2	MVP development, backend setup, domain and hosting
Phase 3 – Launch & Test	Month 3	Beta test with real users, gather feedback
Phase 4 – Marketing	Months 4–6	Public launch, influencer collaborations, content push

Marketing & Customer Acquisition Strategy

- Run content-based marketing via Instagram, YouTube, Aparat
- Partner with Iranian indie music influencers
- Host online challenges, music contests, and collab sessions
- Create SEO blogs and educational videos for musicians
- Offer early-bird promotions and referral incentives

What If We Don't Receive Investor Funding?

If no external investor provides financial support, we'll use a lean bootstrap model:

- Start with a simplified free version on platforms like Wix or Google Sites
- Use Telegram and Instagram to build a community and test interest
- Partner with freelancers on a revenue-sharing basis
- Focus on growing the user base first, then scale tech infrastructure later

Monetization Strategy

- Take a 10% platform commission on all purchases and services
- Offer premium subscriptions for:
 - Extra storage
 - Better analytics
 - Higher profile visibility
- Allow advertisements or sponsorships from relevant music brands
